* Because the blend price adjusted for location was at or below the Class III price in certain zones in some markets in the East North Central, West North Central, Mountain, and Pacific regions, handlers elected not to pool an estimated 1.0 billion and 400 million pounds in June 1996 and 1995, respectively, that normally would have been pooled under these orders. ^{1/} End-of-year figure. Remaining annual statistics are for all markets in effect during any part of the year, except for the Michigan Upper Peninsula market, for which all the data were restricted and thus excluded in 1992. ^{2/} Represents changes over the previous year. Percentages computed from unrounded numbers. Data for 1992 and 1996 have been adjusted to a 365-day basis before computing percent changes. Data for February 1996 have been adjusted to a 28-day basis before computing percent changes. ^{3/} Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period 1995-96, and for which the data were not affected significantly by marketing area changes; all markets are comparable. ^{5/} Average or total.

1/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources. Due to a change in classification procedures that was effective July 1, 1993, sour cream, yogurt, and eggnog are now reported on a used-to-produce basis. Previously, most orders reported data for these products on a disposition basis.

2/ Plain, flavored, and miscellaneous whole milk products.

3/ Plain, solids added, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

4/ Light, heavy, and sour cream and cream dips.

5/ In addition to listed fluid milk and cream products, includes eggnog and yogurt.

6/ Represents changes over the previous year. Percentages are based on the data for all markets combined. Data for 1992 are adjusted to a 365-day basis before computing percent changes.

7/ Represents the data for all Federal milk order markets, except for New York-New Jersey. For percent changes based on comparable markets, see tables 15 and 16.

8/ Percent changes have been adjusted for the different number of days in the two periods. The volume figures have not been adjusted.

SUMMARY OF MILK, SKIM MILK, AND CREAM UTILIZED IN MANUFACTURED PRODUCTS 1/

[illegible]

*Due to the unusual price relationships and/or qualification circumstances in some markets in 1991-1995 and 1996, handlers elected not to pool significant volumes of milk that normally would have been pooled under Federal milk orders. Because this milk would have been classified as Class III under the orders, the utilization in butter, cheese, and nonfat milk production for these years was affected.

includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to non-order plants for processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are preliminary and partially estimated.

2/ In addition to listed manufactured products, includes milk, skim milk, and cream used in other manufactured dairy products: e.g. cottage cheese, evaporated milk, condensed milk, dried products, and aerated cream; and milk, skim milk, and cream used in other food and non-food products. The total also includes dumped or spilled milk and plant loss.

³ Represents changes over the previous year. Percentages are based on the data for all markets combined. These changes are based on pounds of butterfat, except for nonfat dry milk, which are based on pounds of skim milk. Data for 1992 are adjusted to a 365-day basis before computing percent changes. The total also includes dumped or spoiled milk and plant loss.

4/ Represents the data for all Federal milk order markets, except for New York-New Jersey. For percentage changes based on comparable markets, see tables 18 and 19. Percentages are based on pounds of skim milk. Data for 1972 are adjusted to a 365 day basis before computing percent changes.

5/ Percent changes have been adjusted for the different number of days in the two periods. The volume figures have not been adjusted.

^{1/} In-area sales include total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

^{2/} Plain, flavored, and miscellaneous whole milk products.

^{3/} Plain, solids added, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

1/ Prices are for 100 pounds of milk of 3.5 percent butterfat content. Prices are listed generally for the major city in the marketing area; see footnotes on pages 40 and 41 for these locations.
 2/ The fluid differential is the amount added to the Basic Formula Price to determine the Class 1 price. The Basic Formula Price is the base month Minnesota-Wisconsin price for the second preceding month updated with a product price formula. See Table 27. The fluid differentials shown for New England, New York-New Jersey, and Michigan Upper Peninsula reflect location adjustments. The differentials specified in the orders are: New England - \$2.52; New York-New Jersey - \$2.42; and Michigan Upper Peninsula - \$1.15.

See footnotes on pages 42 and 43.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. All averages are weighted.

2/ For those markets which have base-excess plans (see table 21), the prices represent a weighted average of the base and excess prices. For those markets which have multiple component pricing (see table 22), the prices represent the Basic Formula Price plus the weighted average differential price or producer price differential computed under the order.

3/ For the 22 marketing areas where it currently is in effect, this price is applicable to producer milk used to produce nonfat dry milk.

4/ Zone 1 (Boston). Price at 201-210 mile zone: Class I and blend, 72 cents less. Class I and blend price at Hartford, 10 cents less.

5/ New York metropolitan area. Price at 201-210 mile zone: Class I and blend, 72 cents less; Class II and Class III, 8 cents less.

6/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct delivery differential applicable to milk delivered to the Philadelphia area.

7/ Charlotte.

8/ Bristol, Chattanooga, and Knoxville.

9/ Zone 7 (Atlanta and Birmingham).

10/ The figures for 1995 are the weighted averages of the prices for the five merged markets.

11/ Figures exclude, where applicable, Upper Florida, Southeastern Florida, Eastern South Dakota, Black Hills, and Western Colorado; some of the data used to weight the monthly prices are restricted. The individual Class I and blend price data for these markets are shown below. Class II and Class III prices are the same as the prices shown in the table for Carolina.

- 28/ Boise, Idaho.
- 29/ Salt Lake City, Utah.
- 30/ Phoenix.
- 31/ Albuquerque, Santa Fe, and El Paso.
- 32/ Zone 1 (Seattle and Portland).
- 33/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period 1995-96, and for which the data were not affected significantly by marketing area changes; all markets are comparable.

FOOTNOTES FOR TABLES 4 THROUGH 11.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. See footnotes on pages 40 and 41 for location at which price is reported. All averages are weighted.

2/ Figures for 1995 are the summation or weighted averages of the data for the five merged markets and also include data for the Paducah order. The handler formerly regulated under the Paducah order, which was terminated November 1, 1995, now is regulated under the Southeast order.

3/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period 1995-96, and for which the data were not affected significantly by marketing area changes; all markets are comparable. Note, for 1995, the data for Paducah have been combined with the data for Southeast. See 2/.

4/ Figures exclude, where applicable, Upper Florida, Southeastern Florida, Eastern South Dakota, Black Hills, and Western Colorado; some of the data used to weight the monthly prices are restricted.

5/ Data are a summation or weighted average of the Tampa Bay, Upper Florida, and Southeastern Florida marketing areas. The data are combined in order to mask the data for Upper Florida, which are restricted.

6/ In these marketing areas, milk was not pooled due to unusual price relationships. See "*" on page 4.

7/ The data for these marketing areas are combined in order to mask restricted data. See table 1 for complete marketing area name.

FOOTNOTES FOR TABLES 12 THROUGH 19.

1/ In-area sales include total sales in each of the areas by handlers regulated under the respective order, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

2/ Plain, flavored, and miscellaneous whole milk products.

3/ Plain, fortified, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

4/ The "Year to Date" percent changes have been adjusted for the different number of days in the two periods.

5/ Effective November 1, 1995, the order regulating this marketing area was terminated.

6/ New marketing area. Data for the previous year are estimated based on the new marketing area.

7/ Comparable markets are markets where the orders were in effect the entire period 1995-96, and for which the data were not affected significantly by marketing area changes. Excludes Paducah; see 5/.

8/ Excludes New York-New Jersey.

9/ Figures adjusted to eliminate variation in data due to calendar composition.

10/ The data for this market are estimated.

11/ See table 12 for marketing areas included; excludes Paducah.

12/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources. However, sour cream, yogurt, and eggnog are reported on a used-to-produce basis.

13/ Light, heavy, and sour cream, and cream dips.

14/ In addition to listed fluid milk and cream products, includes yogurt and eggnog.

15/ See table 12 for marketing areas included; excludes New York-New Jersey. Percent changes are based on the same groups of comparable markets; all markets are comparable.

16/ Includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants, as well as milk diverted and shipped to non-order plants for processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are preliminary and partially estimated.

17/ In addition to listed manufactured products, includes milk, skim milk, and cream used in other manufactured dairy products, e.g., evaporated milk, condensed milk, dried products, aerated cream, and skim milk equivalent used to fortify fluid milk products; milk, skim milk, and cream used in other food products as well as used in animal feed, dumped or spilled, plant loss, and miscellaneous products.

18/ Percent changes over the previous year are based on the same group of comparable markets--markets where the orders were in effect the entire applicable two year period, and for which the data were not affected significantly by marketing area changes; all markets are comparable. These changes are based on pounds of butterfat, except for nonfat dry milk which are based on pounds of skim milk.

19/ The marketing areas in which milk was not pooled in April 1996 due to unusual price relationships were in these regions. See "*" on page 6.

20/ Restricted.

21/ The marketing areas in which milk was not pooled in May 1995 and 1996 due to unusual price relationships were in these regions. See "*" on page 6.

1/ The orders regulating these marketing areas require that producers be paid on the basis of the weighted average differential, the price per pound for butterfat, and either the price per pound for protein, protein and other solids, or nonfat milk solids. 2/ The Middle Atlantic and Pacific Northwest orders require that producers be paid on the basis of nonfat milk solids. The Chicago Regional, Upper Midwest, Eastern South Dakota, Iowa, and Nebraska-Western Iowa orders require that producers be paid on the basis of other solids. 3/ Weighted average differential price is for "base milk." 4/ Instead of a weighted average differential price, this order calculates a producer price differential. 5/ For this order a fluid carrier price is determined. For May and June, these prices are \$4.44 and \$2.64 per hundredweight, respectively. 6/ The somatic cell adjustment rates per 1000 somatic cell count for this order for March and April are \$0.00075 and \$0.00075, respectively. 7/ Restricted.

1/ This pricing provision is currently in effect in 22 marketing areas. See "Summary of Major Order Actions, December 1993" in FMOS-399 and table 2 in this report for the affected marketing areas. This price is applicable to producer milk used to produce nonfat dry milk.

2/ "Dairy Market News," AMS.

3/ This price series is used in the computation of the modified yield factor and Class III-A Prices in all but 3 of the 22 affected marketing areas. See 1/.

4/ This price series is used in the computation of the modified yield factor and Class III-A Prices in the western marketing areas. See 1/.

5/ 9 less (0.4 divided by the applicable nonfat dry milk price).

6/ (Butterfat differential times 35) plus [(applicable nonfat dry milk price less 12.5 cents) times the applicable modified yield factor].

7/ See 1/ to find the marketing areas that use this nonfat dry milk price series.

8/ New England, New York-New Jersey, and Middle Atlantic also use a seasonal adjustment in the computation of Class III-A prices.

1/ Based on prices at test as reported in "Agricultural Prices," NASS; converted to a 3.5 percent test by using the butterfat differential specified in Federal milk orders for conversion of the blend prices that vary from 3.5 percent. 2/ The Minnesota-Wisconsin (M-W) price series is the average price reported paid to producers for manufacturing grade milk f.o.b. plants in Minnesota-Wisconsin as reported by NASS. Effective with the May 1995 price, the Basic Formula Price replaced the M-W price series, which establishes minimum prices under all Federal milk orders. Prices shown for January through April 1995 are the M-W price series. Prices shown for May through December 1995 are the Basic Formula Price. The average price combines these two price series for the applicable periods. 3/ "Agricultural Prices," NASS. 4/ Animals sold for dairy herd replacement only. 5/ Figures are published for January, April, July, and October only. 6/ Mid-month price. 7/ Includes beef cows and cull dairy cows sold for slaughter, but not dairy cows for herd replacement. 8/ Pounds of 16 percent mixed dairy feed equal in value to 1 pound of milk sold to plants. The methodology utilizes major raw feed component prices from the NASS agricultural commodity prices published monthly.

Summary of Federal Milk Order Actions, May 1996

Suspension:

New York-New Jersey and Middle Atlantic - May 1 (61 FR 20720, 6/8/96). This action suspends a pooling provision of the New York-New Jersey order and suspends a provision in the Middle Atlantic order base-excess plan for the months of May through September 1996. The suspension will allow handlers regulated under the two orders to assemble and transport the milk of dairy farmers more efficiently and thereby reduce costs. Suspension of these provisions in the two orders would permit handlers to freely shift the milk of individual dairy farmers located in a common supply area between the two markets.

Summary of Federal Milk Order Actions, June 1996

Amendment:

Carolina, et al. - June 1 (61 FR 11756, 3/22/96). This action increases the plus location adjustment under the Southeast order by 7 cents for milk delivered to a plant in that portion Of Tangipahoa Parish, Louisiana, south of State Highway 16, and it decreases the plus location adjustment by 7 cents for milk delivered to plants in Mobile, Alabama.

This action denies a proposal to incorporate a transportation credit in the Carolina, Upper Florida, Southeast, Tennessee Valley, Tampa Bay, and Southeastern Florida orders for the months of July 1995 through February 1996. It also denies a proposal for a temporary fluid milk surcharge for the period of November 1995 through March 1996 to pay for the proposed transportation credit.
